

Overview

We've developed a series highlighting the Top 5 Major IATF 16949 Nonconformities (NCs), designed to help your clients and auditors better understand common issues and how to address them. Each NC is paired with four key categories: Sub Clauses, Objective Evidence, Root Cause, and Systemic Corrective Actions.

It's important that this information is shared with your clients, auditors, and relevant stakeholders. How you share it is flexible, but ensuring your audience receives it is necessary.

To Support You, We've Created:

Five Graphics

Each graphic focuses on one NC and summarizes the points of each key category.

Detailed PDF

A complete breakdown of each NC for full reference and understanding.

Suggested Ways to Share

1

Email Blast:

Send all five NC graphics and the PDF directly to your clients.

2

Weekly Newsletter:

Feature one NC per week to maintain engagement and spotlight specific areas.

3

Social Media Posts:

Share individual graphics, similar to our LinkedIn posts.

- Series title example: "We're breaking down the Top 5 Major IATF 16949 Nonconformities, one clause at a time."
- Check out the [IAOB LinkedIn](#) to see our NC series posts

Next Steps

Please review the attached graphics and detailed PDF. Decide on the best way to share these resources with your audience, and make sure they are communicated promptly. You can tailor the messaging to match your communication style, while keeping the key information intact.
